**EXCEL COSMECEUTICALS, INC. SIGNS DISTRIBUTOR CONTRACT  
WITH SANOS ROMANIA**

Bloomfield Hills, Michigan, May 27, 2003 – Michigan based exCel Cosmeceuticals, Inc., manufacturer of AFAs™, amino acid skin care, has contracted with Sanos Romania, to distribute their skin rejuvenation products.

Sanos Romania provides new and innovative scientific solutions for skin care to dermatology and aesthetic surgery practices. With a presence near the capital city of Bucharest, they are one of the leading dermatological and cosmetic suppliers in the nation. Sanos is the first company in Romania to introduce cosmeceutical skin care to the medical community. Participation in the major conferences, held by the Romanian Society of Aesthetic Medicine, has afforded their experienced staff solid exposure to physicians and clinics.

ExCel's patented AFA™ amino acid formulation is now marketed in over 25 countries. The four-year-old cosmeceutical company has attributed its success to their patented AFAs™. The demand for up-to-date, science supported skin care products, that also achieve quick results, has been the cornerstone of exCel's successful marketing. Providing excellent customer service to its international clientele has been a key component in solidifying distributor relationships. Offering customized distribution plans, based on each nation's distinctive needs, has been well received.

Dr. Marvin E. Klein, inventor and CEO of exCel, has enjoyed a history of successful skin rejuvenation formulations such as the TCA Masque and esterified glycolics. Dr. Klein also maintains his private practice of dermatology in Bloomfield Hills, Michigan.
